Dear DVM,

Your client, listed below, has requested our services for their animal. Our services include chiropractic adjustments and/or stretching. Dr. Elizabeth Morris is a Doctor of Chiropractic and a Certified Animal Chiropractor through the American Veterinary Chiropractic Association. AVCA certification is only awarded to licensed Doctor of Chiropractic or Veterinary Medicine who have passed an accredited 240-hour postgraduate program in animal chiropractics. Dr. Morris completed her course with Animal Chiropractic Education Source in Meridian, Texas. For more information about the AVCA or animal chiropractic in general please visit [www.animalchiropractic.org](http://www.animalchiropractic.org).

Chiropractic is **NOT** a replacement for traditional veterinary medicine. Primary care always remains the responsibility of the animal's primary veterinarian. Chiropractic focuses on restoring the spinal column's normal movement and function to promote healthy neurologic activity, which supports effective musculoskeletal function and the overall health of the animal.

This form is to fulfill the referral requirement in South Carolina code SECTION 40-69-270(c).
